Abstract

Innhold

1	Introduction	3
2	Method	3
2.1	Energy convergence	3
2.2	K-points convergence	3
3	Results	3
3.1	Energy convergence	3
3.2	K-points convergence	4
4	Discussion	4
5	Conclusion	4
6	References	4
A	Convergence energy	4
B	Convergence kpoints	5
C	DOS-bilder	6
D	Y-bilder	9
E	Yb-bilder	13
F	Appendix 2	17

Ting å gjøre:

- lage en mappe på saga for begge
done
- skaffe POSCAR, jobfile og INCAR (de andre følger fra disse)
done
- sjekke at den konvergerer (decent ENCUT og KPOINTS)
done

The data shows that we should use 450eV for ENCUT as that is the 1st job with a difference less than 3meV.

For k-density we see that even the lowest value, 1.0, is within 3 meV (1.0 gives around 1.75 meV), so this can be used. However, the data shows that 3.0 is below 1 meV, with 4.0 being identical in energy to 5.0. This can possibly be discussed in group, but 1.0 should technically be enough for k-density.

- relaxe POSCAR og static etter relax POSCAR
done
- total og relativ energi (fra static etter relax)
done
- DOS (båndgap) og LDOS (båndstruktur)
done

- romlig elektronstruktur; 3D-plot av ladningstetthet (VESTA)
- bytte ut hydrogen i alkoholgruppen med lantanoidatomer (Yb, Nd, Tm og Y)
- relaxe POSCAR og static etter relax POSCAR
- total og relativ energi (fra static etter relax)
- DOS (båndgap) og LDOS (båndstruktur)
- romlig elektronstruktur; 3D-plot av ladningstetthet (VESTA)

Ting å ha i L^AT_EX:

- abstrakt
- kort introduksjon av materialet
- kort om metode, valg av paramtere (CUTOFF, etc)
- presentasjon av de viktigste resultatene
- diskusjon av hvordan resultatene kan tolkes, f.eks. sammenligne til eksperimenter eller tidligere beregninger i litteraturen
- konklusjon/oppsummering
- kilder
- appendix ?

OBS: husk å lagre bilder for rapporten og presentasjonen mens man gjør beregningene

1 Introduction

2 Method

2.1 Energy convergence

ENCUT: 300 to 900

2.2 K-points convergence

K-point density: 1.0 to 6.0

3 Results

3.1 Energy convergence

Started to convergence around 450 eV for ENCUT.

3.2 K-points convergence

4 Discussion

5 Conclusion
